Development of sustainable urban mobility in Kołobrzeg

Gmina Miasto Kołobrzeg
Criterion:
low-emission transport

Municipal Commune of Kołobrzeg - The objective of this project is the construction of a transfer hub by the street of Bałtycka: the intersection with the street of Solna, a conversion of 46 public transport stops, a construction of a cycling path in the street of Łopuskiego, which goes to the Municipal Centre of Sports and Recreation, as well as a construction of a path for cyclists and pedestrians in the street of Starynowska; this will ensure safe travel to schools and companies. The entire range of the activities conducted under this project will be completed with the implementation of the city bike system. The implementation of the project will have a high impact on changes in urban mobility resulting in decreased emissions of CO2 and other harmful pollutants that are noxious to the residents and the environment, and on an increased energy efficiency of the transport system.

Signing the project co-financing agreement: 30 May 2018
Total value of the project: PLN 9 593 363.89
Co-financing from the European funds: PLN 6 191 224.09
Completion of the investment: December 2018
